PROFESSIONAL SUMMARY

Highly motivated Information Technology student and aspiring full-stack engineer with hands-on experience in front-end development, C++ programming, and secure server deployments. Proven ability to design interactive web applications and collaborate on impactful community initiatives. Seeking to leverage strong foundational knowledge in data structures, SQL databases, and CI/CD pipelines in a rigorous software engineering environment.

WORK EXPERIENCE & VOLUNTEERING

Community Digital Transformation Volunteer

Ho Chi Minh City District Offices | Jan 2025 – Present

- Assisted in district-wide digital transformation initiatives, increasing local resident tech platform adoption by 15% through hands-on guidance.
- Resolved over 50 technical queries weekly, helping users navigate new government digital platforms and securing high satisfaction rates.
- Collaborated with community leaders to streamline onboarding processes for digital tools, reducing average training time by 20%.

TECHNICAL PROJECTS

Web-Based Educational Platform for Children

HTML, CSS, JavaScript, Tailwind CSS

- Developed interactive addition, subtraction, and synonym matching games tailored for user demographics aged 5-7.
- Engineered core game logic and DOM manipulation in JavaScript, achieving a 100% bug-free pass rate during initial logic testing phases.
- Designed responsive user interfaces with Tailwind CSS, improving user engagement and accessibility metrics across mobile devices.

Smart Floating Homes – Disaster Relief Proposal

Systems Design, Project Management

- Structured a comprehensive group project proposal addressing flood impacts in Nghệ An through smart floating home architecture.
- Outlined technical specifications for integrating clean energy systems and water filtration technology, modeling 3 core independent subsystems.

Secure Server Task Deployment Integration

Ubuntu 24.04 LTS, Git, GitLab CI/CD, KiloClaw

- Deployed and monitored automated scripts on a secure KiloClaw server environment running Ubuntu 24.04 LTS.
- Configured GitLab CI/CD runner setups and managed .gitmodules, reducing manual deployment overhead time by 40%.

EDUCATION

Bachelor of Information Technology

University in Ho Chi Minh City | Expected Graduation: 2028

- **Relevant Coursework:** Computer Architecture, Discrete Structures, Databases, Computer Networks (TCP/UDP), Operating Systems, Software Engineering (UML).
- **Academic Achievements:** Delivered a successful team presentation analyzing CPU Scheduling, memory management, and Banker's Algorithm.

SKILLS & TECHNOLOGIES

Programming Languages: C++ (Pointers, STL Vectors, std::unordered_map, Recursion), JavaScript, HTML/CSS, SQL.

Frameworks & Developer Tools: Tailwind CSS, Visual Studio Code, Git, GitHub, GitLab CI/CD, MINGW64.

Systems & Architecture: SQL Server, Ubuntu Linux, VPS Hosting (ZoneCloud), UML Modeling, Object-Oriented Programming.

ACHIEVEMENTS & CERTIFICATIONS

- **Gemini Certification:** Earned credential as a university student from Google for Education (Dec 2025).
- **Industry Engagement:** Registered and attended the Vietnam Web Summit in Ho Chi Minh City (Dec 2024).
- **Continuous Development:** Active participant on LeetCode and Viblo platforms for software engineering best practices.
