

ELENA ROSTOVA

Senior Machine Learning Platform & Pipeline Engineer

elena.r@email.com | Seattle, WA

PROFESSIONAL SUMMARY

Senior Engineer with 5+ years of experience architecting large-scale data transformation platforms and automated model lifecycle pipelines. Specialist in distributed workflow execution, automated data validation frameworks, enterprise analytical warehouses, and continuous model governance.

TECHNICAL SKILLS & COMPETENCIES

- Core Capabilities:** Distributed Data Processing & ETL Automation
- Governance:** Machine Learning Lifecycle Governance & Artifact Tracking
- Quality Assurance:** Automated Data Quality Verification & Monitoring
- Data Warehousing:** Enterprise Cloud Data Warehousing & Observability
- Stack:** Python, SQL, Cloud Architecture, CI/CD Pipeline Automation

PROFESSIONAL EXPERIENCE

Lead Machine Learning Platform Engineer | Apex AI | 2021 - Present

- Architected automated model lifecycle tracking platforms handling dataset versioning, hyperparameter logging, and automated model registry deployments.
- Built distributed data ingestion workflows processing multi-terabyte daily streams into cloud data warehouses.
- Integrated automated data contract and quality assurance checks across ETL jobs, reducing data corruption incidents by 80%.
- Implemented real-time system metrics observability and alerting dashboards for machine learning microservices.

EDUCATION

M.S. in Data Engineering - University of Washington (2019)
